

Module 5 Wrap-Up Activity

Information Detective Challenge

Course:BSIT

Introduction to Computing / IT Fundamentals

Module:

Module 5 – Information Literacy: Searching, Accessing, and Evaluating Information

Student Name: ASUNCION, CARL ANGELO E.

Section: BSIT-S10

Date: August 14, 2026

Learning Objective

Apply effective search strategies and evaluate the reliability of online information using the CABC Test (Credibility, Accuracy, Bias, and Currency).

Instructions

For this activity, you will act as an **Information Detective**. Your task is to search for information on a chosen topic, evaluate the reliability of an online source, identify its source type, and determine whether it is appropriate for academic use.

Choose **ONE** topic from the list below:

- ☐ Artificial Intelligence in Education
- ☐ Cybersecurity for Students
- ☒ Social Media and Mental Health
- ☐ Cloud Computing
- ☐ Digital Citizenship

Part 1 – Smart Searching

Write the search query you would use to find information about your chosen topic.

Example: > cybersecurity threats in schools

Your Search Query: Social Media Effects On Mental Health Of Adolescents

Part 2 – Source Selection

Find **ONE website** related to your chosen topic and provide the following information.

Website Title: Health Advisory on Social Media Use in Adolescence

Website URL:

<https://www.apa.org/topics/social-media-internet/health-advisory-adolescent-social-media-use>

Part 3 – Apply the CABC Test

Evaluate your chosen website using the CABC Test.

C – Credibility

Who wrote or published the information?

The information was published by the American Psychological Association (APA). It is based on psychological science and research from experts, making it a credible source.

A – Accuracy

What evidence, facts, statistics, references, or supporting information are provided?

The website provides research-based information about both the positive and negative effects of social media on adolescents. It discusses issues such as social support, cyberbullying, sleep problems, social comparison, and problematic social media use.

B – Bias

Is the website trying to persuade, promote, advertise, or sell something? Explain your answer.

The website is not mainly trying to sell or advertise a product. It presents both benefits and possible risks of social media, although it focuses on protecting adolescents' mental health.

C – Currency

When was the information published or last updated?

The information was created in May 2023. It is still a useful and relevant source because it addresses current concerns about social media and adolescent mental health.

Part 4 – Source Type

Identify the type of source.

- ☐ Scholarly Source
- ☒ Professional Source
- ☐ Public Source

Explain why you selected this source type:

The source is a professional source because it was published by the American Psychological Association, a professional organization for psychology. The information is based on psychological research and expert recommendations, making it useful for understanding social media and mental health.

Part 5 – Final Decision

Would you use this source for a school assignment?

☒ Yes

☐ No

Justify your answer using the CABC Test.

I would use this source for a school assignment because it is credible, accurate, and based on scientific research. It does not mainly promote or sell anything, and it provides information about both the positive and negative effects of social media on mental health. Although the advisory was published in 2023, it remains a reliable professional source for this topic.

Reflection Question

What is the most important thing you learned about searching for and evaluating online information?

The most important thing I learned is that I should not believe everything I find online. I learned to use the CABC Test by checking the source's Credibility, Accuracy, Bias, and Currency before using information. This helps me identify reliable sources and avoid misinformation. I also learned that trusted organizations like the American Psychological Association provide research-based information that can be useful for school assignments

Submission Requirements

Submit a PDF copy of your completed activity through GITHUB Make sure that the link is directed to your activity and not just an empty repository. Submit your links thru the google form that is provided in your respective google classroom.

Reminder:

Before using any information from the internet for school work, always apply the **CABC Test**:

- **C** – Credibility
- **A** – Accuracy
- **B** – Bias
- **C** – Currency

Being information literate means not only finding information, but also ensuring that the information is reliable and appropriate for academic use.
